Basis of Presentation

In this Investor Financial Supplement, the terms "we," "us," "our," "Enstar," or "the Company" refer to Enstar Group Limited and its consolidated subsidiaries. All information contained herein is unaudited. Unless otherwise noted, amounts are in thousands of U.S. Dollars, except for share and per share amounts and ratio information. Certain prior period comparatives have been reclassified to conform to the current presentation. This investor financial supplement is being provided for informational purposes only. It should be read in conjunction with documents filed by Enstar with the U.S. Securities and Exchange Commission, including its Annual Reports on Form 10-K and its Quarterly Reports on Form 10-Q.

Non-GAAP Operating Income (Loss) Attributable to Enstar Ordinary Shareholders

In addition to presenting net earnings (loss) attributable to Enstar ordinary shareholders and diluted earnings (loss) per ordinary share determined in accordance with U.S. GAAP, we believe that presenting non-GAAP operating income (loss) attributable to Enstar ordinary shareholders and diluted non-GAAP operating income (loss) per ordinary share, both of which are non-GAAP financial measures as defined in SEC Regulation G, provides investors with valuable measures of our performance.

Non-GAAP operating income (loss) is net earnings attributable to Enstar ordinary shareholders excluding: (i) net realized and unrealized (gains) losses on fixed maturity investments and funds held - directly managed included in net earnings (loss), (ii) change in fair value of insurance contracts for which we have elected the fair value option, (iii) gain (loss) on sale of subsidiaries, if any, (iv) net earnings (loss) from discontinued operations, if any, (v) tax effect of these adjustments where applicable, and (vi) attribution of share of adjustments to noncontrolling interest where applicable. We eliminate the impact of net realized and unrealized (gains) losses on fixed maturity investments and funds held - directly managed and change in fair value of insurance contracts for which we have elected the fair value option because these items are subject to significant fluctuations in fair value from period to period, driven primarily by market conditions and general economic conditions, and therefore their impact on our earnings is not reflective of the performance of our core operations. We eliminate the impact of gain (loss) on sale of subsidiaries and net earnings (loss) from discontinued operations because these are also not reflective of the performance of our core operations. Diluted Non-GAAP operating income (loss) per ordinary share is diluted net earnings per ordinary share excluding the per diluted share amounts of each of the adjustments used to calculate non-GAAP operating income (loss).

We believe these non-GAAP measures enable readers of our consolidated financial statements to analyze our results in a way that is more aligned with the manner in which our management measures our underlying performance. We believe that presenting these non-GAAP financial measures, which may be defined and calculated differently by other companies, improves the understanding of our consolidated results of operations. These measures should not be viewed as substitutes for those calculated in accordance with U.S. GAAP.

Reserve / Claims Savings - Non-GAAP

Reserve / Claims Savings is a non-GAAP measure calculated using components of amounts determined in accordance with U.S. GAAP and disclosed in our quarterly and annual U.S. GAAP consolidated financial statements. Reserve / Claims Savings is calculated by adding (i) the reduction (increase) in estimates of net ultimate losses relating to prior periods, included in net incurred losses and LAE, and (ii) the reduction (increase) in estimates of ultimate net defendant asbestos and environmental ("Defendant A&E") liabilities relating to prior periods, included in other income (expense). Because the reduction (increase) in estimates of ultimate Defendant A&E liabilities for prior periods is presented as a component of other income (expense) in our consolidated statement of earnings, there is not a U.S. GAAP measure that is directly comparable to Reserve/Claims Savings presented on a non-GAAP basis. However, we believe Reserve / Claims Savings provides investors with a meaningful measure of claims management performance within our Non-life Run-off segment that is consistent with management's view of the business because it combines the reduction (increase) in estimates of net ultimate losses related to our direct exposure to certain acquired asbestos and environmental liabilities with the reduction (increase) in estimates of net ultimate losses related to liabilities that we have insured. See "Non-life Run-off Reserve / Claim Savings" on page 12 for further information.

Investment Composition - Non-GAAP

In certain instances, U.S. GAAP requirements result in classifications of our investment assets that may not correspond to management's view of the underlying economic exposure of a particular investment. As such, we have prepared a non-GAAP view of our invested assets based on our assessment of the underlying economic exposure of each investment, which is consistent with the manner in which management views our investment portfolio composition. GAAP requires, in part, that invested assets be classified based upon the legal form of the investment without regard to the underlying economic exposure. Management's view "looks through" the legal form of an investment and aggregates the classification based upon the underlying economic exposure of each investment. For example:

1. Enstar has certain private equity funds, privately held equity (which are direct investments in companies), private credit funds and real estate equity funds that are collectively held in a limited partnership. U.S. GAAP requires that the investment be classified as "Private equity funds" within "Other Investments." For management reporting purposes, we disaggregate private equity funds, privately held equity, private credit funds and real estate equity funds and present them separately based on the underlying investment.
2. Enstar has certain public equity investments that are held directly on its balance sheet and some that are held in a fund. U.S. GAAP requires that the investment on our balance sheet be classified as "Equities" in our financial statements. Public equity held in fund format is classified as "Equity funds" within "Other Investments". For management reporting purposes, we have aggregated all directly held public equity and public equity funds into one line item "Equities."
3. Enstar has certain investments in public shares of exchange traded funds ("ETF") where the underlying exposure of the ETF is an investment in investment grade fixed income securities. U.S. GAAP requires that the investment be classified as "Equities." For management reporting, we have classified the investment as "Bond/loan funds."
4. Enstar has certain investments in public equity investments where the underlying investments are CLO mezzanine debt. For management reporting purposes, we have classified these investments as "Bond/loan funds."
5. Enstar has certain investments in direct CLO equities and some in fund format. For management reporting purposes, we have aggregated all CLO equities into one line item of "CLO equities."

Underwriting Ratios

In presenting our results for the Atrium and StarStone segments, we discuss the loss ratio, acquisition expense ratio, operating expense ratio, and the combined ratio of our active underwriting operations within these segments. Management believes that these ratios provide the most meaningful measure for understanding our underwriting profitability. These measures are calculated using U.S. GAAP figures presented on the statements of earnings for both Atrium and StarStone. The loss ratio is calculated by dividing net incurred losses and LAE by net premiums earned. The acquisition expense ratio is calculated by dividing acquisition costs by net premiums earned. The operating expense ratio is calculated by dividing operating expenses by net premiums earned. The combined ratio is the sum of the loss ratio, the acquisition expense ratio and the operating expense ratio.
